Summary

Driven and adaptable Software Developer with a BSc in IT Software Engineering, specializing in full-stack web development and modern application design. Proficient in .NET, C#, PHP, Kotlin, JavaScript, and WordPress, with hands-on experience delivering responsive, user-focused solutions across web and mobile platforms. Passionate about building scalable, high-performance applications and contributing to innovative development teams. Committed to continuous learning, actively pursuing certifications and staying current with AI, cloud technologies, and emerging industry trends.

Education

BSc Information Technology, Eduvos | South Africa (2024)

Major: Software Engineering

Experience

Intern Operations Manager | Aquas Catering

February 2023 - present

- Assisted in managing daily operations to ensure smooth service delivery and customer satisfaction.
- Coordinated staff schedules, monitored inventory levels, and supported procurement processes to maintain optimal stock for catering events.
- Contributed to streamlining workflow processes and improving operational efficiency through hands-on involvement in logistics and event planning.
- Supported budgeting and cost-control efforts, helping reduce waste and improve profitability.

Freelancer | Tarmek

September 2025 - present

- Designed and developed a fully responsive WordPress website for a logistics company, ensuring seamless functionality, speed optimization, and strong brand alignment.
- Implemented SEO best practices (on-page optimization, keyword integration, and metadata management) to improve search rankings and online visibility.
- Configured and secured hosting environments, applied WordPress security protocols, and optimized site performance through caching and plugin management.
- Integrated Google Analytics and managed Google Search Console to monitor traffic, enhance SEO performance, and support data-driven decisions.

Freelancer | Magogos Hut

August 2025 - present

- Developed a WordPress-based website for a catering business, focusing on brand storytelling, menu presentation, and online engagement.
- Integrated Google reCAPTCHA to enhance form security and prevent spam submissions.
- Applied SEO best practices to improve discoverability and organic traffic growth.
- Managed ongoing content updates, plugin maintenance, and visual improvements to align with evolving business goals.

- **Web Development:** PHP, MySQL, HTML5, CSS3, JavaScript, C#, WordPress, Presta shop, Git/GitHub, MVC, Bootstrap, Canva and Figma.
- **Networking & Security:** Academic training in firewalls, secure protocols, and access control aligned with hospitality data protection needs.
- **Databases:** MySQL, SQL Server Management Studio, Oracle, JPA experienced in designing, querying, and maintaining structured data.
- **API Testing Tools:** Postman, Swagger.
- **Documentation & Compliance:** Skilled in creating audit-ready system documentation, user entitlement records, and procedural guides

Projects

Resume Maker

- Developed a full-stack ASP.NET Core MVC application enabling users to create and manage professional resumes with three customizable themes (Minimal, Classic, Modern)
- Implemented secure multi-user authentication using ASP.NET Core Identity with claims-based authorization, ensuring complete data isolation between users.

- Built dynamic resume sections supporting work experience, education, projects, certifications, languages, and skills with real-time form validation and nested collection management.

Flashcards Desktop App

- Built a full-featured flashcard application using .NET 8, WPF, and SQL Server with complete CRUD operations, category-based organization, and 85+ pre-loaded sample cards.
- Developed intelligent study sessions with customizable question counts, random card selection, real-time validation, and instant feedback with color-coded difficulty levels.
- Designed normalized database architecture with automated initialization, proper foreign key relationships, and efficient data persistence for study progress tracking.
- Implemented analytics and reporting including session history, performance statistics, yearly pivot reports, and professional PDF export using QuestPDF library.

Aquas Catering

- Developed and launched a responsive website using PHP, CSS, HTML, and JavaScript.
- Implemented Google Analytics to track website traffic and user behavior.
- Deployed the website on a free hosting platform for a cost-effective solution.
